Work Experience

React Js Internship • Brainovision Pvt Ltd

January 2022 - February 2022

I worked as React Js intern at Brainovision Pvt Ltd. It was a course cum internship, so I learned the various new things regarding React Js and implemented those concepts in building small projects.

Website Designing Internship • Internship Studio

January 2022 - February 2022

I worked as a website designing intern at an internship studio. As a final project, I have developed the front end of the E-Commerce portal.

Projects

E-Commerce Website Design

The frontend of an e-commerce website is the part that online shoppers see and interact with. This is also referred to as the digital storefront. The website design was created with the aim of having a better user experience for e-commerce activities.

Tech stack : HTML5, CSS3, Bootstrap, Javascript, jQuery.

University Website Design

The front end of the university website is created with a clear description of home ,about, courses, blog and contact sections. The design was created with the aim of creating effective university websites that can increase conversions, strengthen institutional credibility and brand, improve user satisfaction, and save time and money.

Tech stack : HTML5, CSS3, Javascript.

Text Utility Application

The text utility application is software that allows us to perform various tasks on a given piece of text. The application I have created performs tasks like creating text to uppercase & lowercase, copying text, searching text, removing extra spaces and clearing text from the textbox. Using some other logic, the application can perform many more tasks.

Tech stack : React Js, JSX, CSS3.

To-Do List Application

To-Do List project is an application specially built to keep track of errands or tasks that need to be done. This application will be like a task keeper where the user would be able to enter the tasks that they need to do. Once they are done with their tasks, they can also remove them from the list.

Tech stack: React Js, JSX, CSS3.

Weather Application

This application provides accurate weather information based on location. OpenWeatherMap is a service that provides various weather data through an API. I have integrated the API into the application and used it for getting dynamic data description regarding weather information.

Teck stack: HTML5, CSS3, Javascript, API.

Volunteering Experience

Udaan Club Member

I work as a core team member at UDAAN -Competitive Club, GECA. The area of my responsibility is creating posters for club activities and maintaining the students data regarding book management.
